- Trade frequency: Daily

TTHS – Client Returns

2008 – 2011 (Extreme 12% Risk Level)

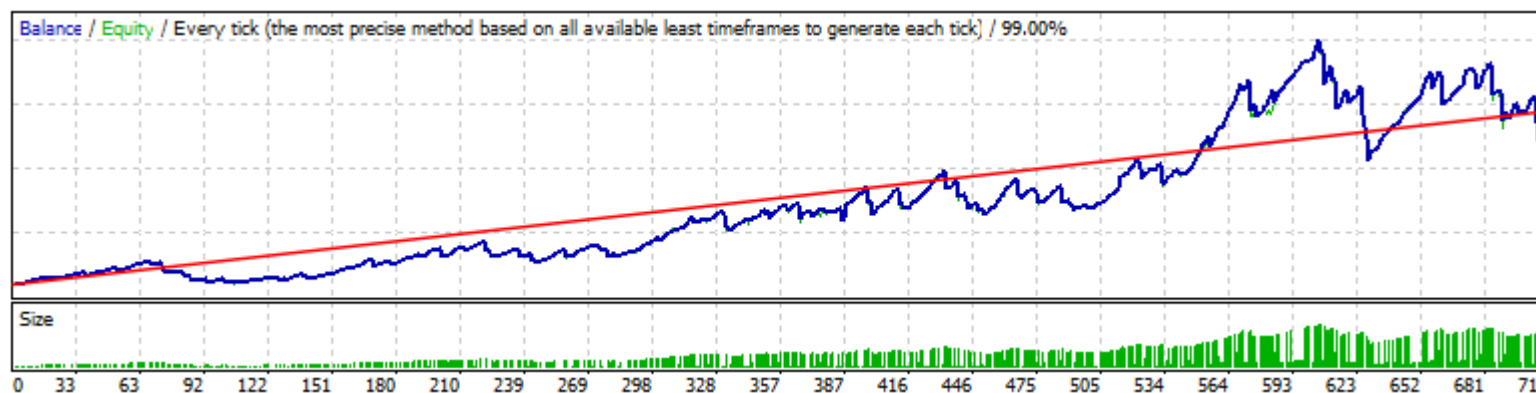

The following results derive from historical backtests performed using 99% accurate tick data and whilst we believe these results to be highly accurate, please remember that they must be regarded as ‘hypothetical approximations’.

The spread used throughout these tests was 1.4 pips. Figures do not include any overnight swap charges.

Each year assumes the client is starting with \$5,000 USD capital.
